General Information

Document Type:	Grants Notice	Version:	Synopsis 1
Funding Opportunity Number:	PDR-2600-DC-029Q	Posted Date:	May 29, 2026
Funding Opportunity Title:	Mass Market Solutions for Leveraging Robotics and AI Technologies for Home Construction Demonstration	Last Updated Date:	May 29, 2026
Opportunity Category:	Discretionary	Original Closing Date for Applications:	Jul 13, 2026 Electronically submitted applications must be submitted no later than 11:59:59 p.m., ET, on the listed application due date.
Opportunity Category Explanation:		Current Closing Date for Applications:	Jul 13, 2026 Electronically submitted applications must be submitted no later than 11:59:59 p.m., ET, on the listed application due date.
Funding Instrument Type:	Cooperative Agreement	Archive Date:	
Category of Funding	Housing Science and Technology	Estimated Total Program	\$ 10,000,000

Activity:	and other Research and Development	Funding:	
Category		Award Ceiling:	\$10,000,000
Explanation:		Award Floor:	\$3,000,000
Expected Number of Awards:	3		
Assistance Listings:	14.536 -- Research, Evaluation, and Demonstrations		
Cost Sharing or Matching Requirement:	No		

Eligibility

Eligible Applicants:	Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education Small businesses Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education For profit organizations other than small businesses Private institutions of higher education Public and State controlled institutions of higher education
Additional Information on Eligibility:	Historically Black Colleges and Universities (HBCUs); Tribally Controlled Colleges and Universities (TCCUs); Non-profit Applicants: To confirm your eligibility as an applicant with non-profit status, HUD will use data from the Internal Revenue Service (IRS). Individuals, foreign entities, and sole proprietorship organizations are not eligible to compete for, or receive, awards made under this announcement.

Additional Information

Agency Name: Department of Housing and Urban Development

Description: The U.S. Department of Housing and Urban Development's Office of Policy Development and Research (PD&R) expects to release a Notice of Funding Opportunity for the Mass Market Solutions for Leveraging Robotics and AI Technologies for Home Construction Demonstration. This anticipated NOFO is intended to fund demonstration projects that test and scale the use of automation, robotics, and artificial intelligence in factory-built housing to help build homes faster, at lower cost, and in ways that can meaningfully increase housing supply. Awards are expected to be made as cooperative agreements, which means HUD will be actively involved throughout the project period. PD&R will provide technical guidance and oversight to help ensure projects are well designed, aligned with program goals, and able to generate lessons that can be applied more broadly across the housing industry. HUD is especially interested in projects that use automation, robotics, or AI at specific stages of the factory-built housing process, whether onsite or offsite. Eligible approaches may include panelized systems, modular construction, or fully volumetric homes. Projects must show that the proposed technology can produce housing components at a scale sufficient to deliver a defined number of homes and clearly explain how the technology improves construction speed, labor efficiency, quality, or cost. The overall goal of this NOFO is to support technologies that can move beyond a single pilot and be scaled for wider use, contributing to long-term increases in housing supply. Applicants should explain how their project bridges the gap between early development and commercial use and should quantify expected affordability benefits, such as reduced construction time or labor needs. The program supports Administration priorities to lower housing costs and expand housing supply and requires projects to follow principles of Gold Standard Science.
